Forecast for Thursday 28 Jan 2021

Weather: Periods of snow continuing through the day, turning heavy at times. Less cold air will spread to the Island ranges so turning more to rain in the afternoon, but further north snow could fall to quite low levels during heavier spells. The strong easterly winds will bring blizzards and white-out conditions to the mountains.

Chance of cloud free mountain/hill tops above 800m: Very little chance.

Visibility: Poor or very poor, nil in white-out conditions. Cloud widely down to 450-750m, perhaps a little higher over the far northwest.
